

## European Union Deforestation Regulation

### **PURPOSE**

Sylvamo is committed to the long-term health of our entire ecosystem, including the forests we love, the communities where we live and those who rely on our paper.

### **OUR PRINCIPLES**

We recognize the environmental, social and economic values of forested landscapes. We play an active role in preventing deforestation and forest degradation, while promoting and increasing the use of responsibly managed forests. Our entire business depends on the sustainability of forests.

### **OUR APPROACH**

As the EU Deforestation Regulation (EUDR) evolves, Sylvamo is collaborating with regional and global stakeholders seeking additional guidance and explanation from the EU Commission. We are closely monitoring the development of the benchmarking system and guidelines for operators and traders in preparation for EUDR implementation. We intend to work with our suppliers, customers and other business partners to support compliance in our supply chain.

As we prepare to meet our compliance obligations under EUDR, we will continue to follow our [Global Fiber Procurement Policy](#).
